

The Seasons Change

In many places in the world, it is very hot. In other places it can be hot or cold. It can change during the year. We call these different times of the year "seasons".

In some countries, like the United States, it can change a lot. Some places are hot all year round. In other places summer becomes fall and it gets colder. Then winter comes and it is very cold. Snow falls and water freezes.

Winter does not last forever. It begins to get warmer. Snow and ice melt. Plants start to grow again. This is spring.

Summer comes after spring. It is warm and can be very hot. Children have no school and can play outside. Many people like summer the best of all.
