## Attributes of Two Dimensional Figures

```
In this worksheet, we will practice recognizing the attributes of two dimensional shapes. For example, circle all the shapes that have three sides.
[right triangle square rectangle (isosceles triangle) pentagon
(equilateral triangle) trapezoid rhombus hexagon octagon
```

## Exercise Questions:

1. Circle all the shapes that have four sides.

| triangle | square | rectangle | pentagon |
| :--- | :--- | :--- | :--- |
| kite | rhombus | hexagon | circle |

2. Underline all the shapes that have at least one right angle.

| equilateral triangle | rectangle | circle | square |
| :--- | :--- | :--- | :--- |
| kite | right triangle | trapezoid | rhombus |

3. Circle all the shapes that are parallelograms.

| square | circle | right triangle | rectangle | kite |
| :--- | :--- | :--- | :--- | :--- |
| rhombus | pentagon | trapezoid | hexagon | octagon |

4. Underline all the shapes that have all equal sides.

| equilateral triangle | rectangle <br> rhombus | square <br> cite | right triangle |
| :--- | :--- | :--- | :--- |

5. Circle the shape that is not a polygon.

| triangle | square | rectangle | pentagon | circle |
| :--- | :--- | :--- | :--- | :--- |
| rhombus | hexagon | trapezoid | kite | octagon |

## Answer Key

## Attributes of Two Dimensional Figures

In this worksheet, we will practice recognizing the attributes of two dimensional shapes. For example, circle all the shapes that have three sides.
(right triangle) square rectangle (isosceles triangle) pentagon (equilateral triangle trapezoid rhombus hexagon octagon

## Exercise Questions:

1. Circle all the shapes that have four sides.

2. Underline all the shapes that have at least one right angle.

| equilateral triangle | $\frac{\text { rectangle }}{}$ | circle | square |
| :--- | :--- | :--- | :--- |
| kite | right triangle | trapezoid | rhombus |

3. Circle all the shapes that are parallelograms.
$\left\{\begin{array}{lllll}\text { square ] } & \text { circle } & \text { right triangle } & \text { (rectangle } & \text { kite } \\ \text { rhombus } & \text { pentagon } & \text { trapezoid } & \text { hexagon } & \text { octagon }\end{array}\right.$
4. Underline all the shapes that have all equal sides.

| equilateral triangle | rectangle <br> rhombus | square | right triangle <br> circle |
| :--- | :--- | :--- | :--- |

5. Circle the shape that is not a polygon.

| triangle | square | rectangle | pentagon | (circle ) |
| :--- | :--- | :--- | :--- | :--- |
| rhombus | hexagon | trapezoid | kite | octagon |
