

Name _____

Date _____

Analyzing Line Plots

In this worksheet, we will practice analyzing data in line plots.

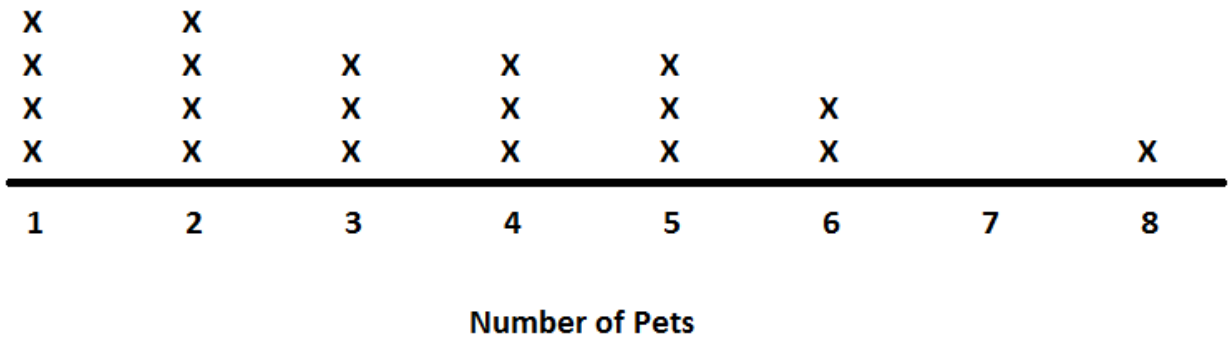

For example, how many people had 2 cousins? (3 people)

What fraction of people had 3 cousins? (2/14)

What fraction of people had 3 cousins or less? (7/14)

Exercise Questions:

Use the line plot below to answer questions 1-6.

1. What fraction of people have 4 pets? _____
2. What fraction of people have less than three pets? _____
3. What fraction of people have more than five pets? _____
4. What fraction of people have between three and five pets? _____
5. What fraction of people have either 3 or 6 pets? _____

Answer Key

Analyzing Line Plots

In this worksheet, we will practice analyzing data in line plots.

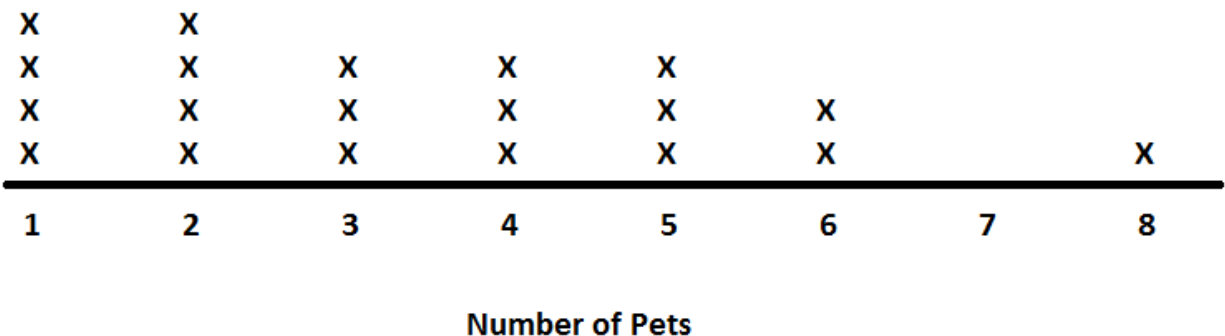

For example, how many people had 2 cousins? (3 people)

What fraction of people had 3 cousins? (2/14)

What fraction of people had 3 cousins or less? (7/14)

Exercise Questions:

Use the line plot below to answer questions 1-6.

1. What fraction of people have 4 pets? 3/20
2. What fraction of people have less than three pets? 8/20
3. What fraction of people have more than five pets? 3/20
4. What fraction of people have between three and five pets? 9/20
5. What fraction of people have either 3 or 6 pets? 5/20
