

Name _____

Date _____

Identify and Locate Numbers on a Number Line

In this worksheet, we will practice identifying and locating fractions, mixed numbers, decimals, and integers on a number line.

For example,

What fraction should be in the place of the letter A? $\frac{3}{4}$

Circle where the decimal .25 would be on the number line above.

Exercise Questions:

Use the number line below for questions 1 and 2.

1. Draw a red dot where $\frac{5}{2}$ would be on the number line.
2. Draw a blue dot where 3.5 would be on the number line.

Use the number line below for questions 3 and 4.

3. Draw a red dot where .75 would be on the number line.
4. Draw a blue dot where $\frac{15}{5}$ would be on the number line.

Use the number line below for questions 5 and 6.

5. Draw a red dot where $\frac{3}{4}$ would be on the number line.
6. Draw a blue dot where .25 would be on the numberline.

Answer Key

Identify and Locate Numbers on a Number Line

In this worksheet, we will practice identifying and locating fractions, mixed numbers, decimals, and integers on a number line.

For example,

What fraction should be in the place of the letter A? $\frac{3}{4}$

Circle where the decimal .25 would be on the number line above.

Exercise Questions:

Use the number line below for questions 1 and 2.

1. Draw a red dot where $\frac{5}{2}$ would be on the number line.
2. Draw a blue dot where 3.5 would be on the number line.

Use the number line below for questions 3 and 4.

3. Draw a red dot where .75 would be on the number line.
4. Draw a blue dot where $\frac{15}{5}$ would be on the number line.

Use the number line below for questions 5 and 6.

5. Draw a red dot where $\frac{3}{4}$ would be on the number line.
6. Draw a blue dot where .25 would be on the number line.
