Adding Single & Double Digit Numbers

A good strategy to use when you are asked to count up from a number is mental math. You can use different strategies. For example, if you are asked to start at 10 and count up 4, you can say ten in your head and then count four more until you reach your number. Look at the problems below. Use mental math to count up.

If you start at 13 and count up 5, you get to: _____

If you start at 11 and count up 1, you get to: _____

If you count up 2 from 12 you get to: _____

If you count up 6 from 14 you get to: _____

If you start at 10 and count up 8, you get to: _____

If you start at 1 and count up 10, you get to: _____

If you count up 4 from 15 you get to: _____
