Pet Subtraction Word Problems

Solve the following subtraction word problems. Underline the clue words that would help you know which operation must be used when solving the problems.

Answers

If there are 12 fish swimming together and 6 fish swim away, how many fish are left?

$$\underline{12 - 6 = 6}$$

9 birds are flying together and 3 fly away, how many birds are left?

$$\underline{9 - 3 = 6}$$

If there are 10 dogs playing in the dog park and 2 go home, how many dogs are left?

$$\underline{10 - 2 = 8}$$
