Skip Counting by Hundreds: Fill in the Blanks

Skip counting is counting forward or backwards using multiples. Once you are able to skip count, you can also begin to learn multiplication facts. When you skip count by hundreds for example, you are also counting by the multiples of a hundred. Use mental math to count to 800 by hundreds, 100×8 is just like 100 counted 8 times equaling 800.

100, _____, _____, _____, _____, _____, 700, _____, _____, 1000
