## Master Mathematician Place Value Addition

Master mathematicians look at numbers in many different ways. Look at the addition problems below. You should translate the written place value into a number and add.

$8 \text{ ones} + 4 \text{ hundreds} = \underline{\hspace{2cm}}$

$8 \text{ hundreds} + 8 \text{ ones} = \underline{\hspace{2cm}}$

$6 \text{ hundreds} = \underline{\hspace{2cm}}$

$5 \text{ tens} + 9 \text{ hundreds} = \underline{\hspace{2cm}}$

$2 \text{ hundreds} + 2 \text{ tens} = \underline{\hspace{2cm}}$

$2 \text{ ones} + 4 \text{ hundreds} = \underline{\hspace{2cm}}$

$9 \text{ tens} + 9 \text{ hundreds} = \underline{\hspace{2cm}}$

$7 \text{ hundreds} + 6 \text{ ones} = \underline{\hspace{2cm}}$

## Master Mathematician Place Value Addition

### Answers

Solve the equations:

$$8 \text{ ones} + 4 \text{ hundreds} = \underline{408}$$

$$8 \text{ hundreds} + 8 \text{ ones} = \underline{808}$$

$$6 \text{ hundreds} = \underline{600}$$

$$5 \text{ tens} + 9 \text{ hundreds} = \underline{950}$$

$$2 \text{ hundreds} + 2 \text{ tens} = \underline{220}$$

$$2 \text{ ones} + 4 \text{ hundreds} = \underline{402}$$

$$9 \text{ tens} + 9 \text{ hundreds} = \underline{990}$$

$$7 \text{ hundreds} + 6 \text{ ones} = \underline{706}$$
