

Multiplication and Division

In this worksheet, we will practice solving multiplication and division problems. You will see multiplication and division problems written horizontally, like this : $5 \times 5 = ?$ and $45 \div 5 = ?$

You will also see division problems written like this: $4 \overline{)40}$

You will also see a couple of multiplication word problems, like this:

Marcus has 2 bags of 4 oranges each. How many total oranges does he have?

Marcus has 2×4 oranges, a total of **8** oranges.

Exercise Questions:

1.

$12 \times 6 = \underline{\quad}$

7. Amelia has three shelves of dolls. There are six dolls on each shelf. How many total dolls does she have?

2.

$9 \times 6 = \underline{\quad}$

Amelia has dolls.

3.

$56 \div 7 = \underline{\quad}$

8. Ernest has four bags of marbles. Each bag has 20 marbles in it. How many total marbles does he have?

Ernest has marbles.

4.

$63 \div 9 = \underline{\quad}$

5.

$15 \overline{)60}$

6.

$8 \overline{)72}$

Answer Key

Multiplication and Division

In this worksheet, we will practice solving multiplication and division problems. You will see multiplication and division problems written horizontally, like this : $5 \times 5 = ?$ and $45 \div 5 = ?$

You will also see division problems written like this: $4 \overline{)40}$

You will also see a couple of multiplication word problems, like this:

Marcus has 2 bags of 4 oranges each. How many total oranges does he have?

Marcus has 2×4 oranges, a total of **8** oranges.

Exercise Questions:

1.

$$12 \times 6 = \underline{72}$$

7. Amelia has three shelves of dolls. There are six dolls on each shelf. How many total dolls does she have?

2.

$$9 \times 6 = \underline{54}$$

Amelia has 18 dolls.

3.

$$56 \div 7 = \underline{8}$$

8. Ernest has four bags of marbles. Each bag has 20 marbles in it. How many total marbles does he have?

Ernest has 80 marbles.

4.

$$63 \div 9 = \underline{7}$$

$$5. \quad \underline{4}$$

$$15 \overline{)60}$$

$$6. \quad \underline{9}$$

$$8 \overline{)72}$$
