

Name _____

Date _____

Measuring Liquid Volume

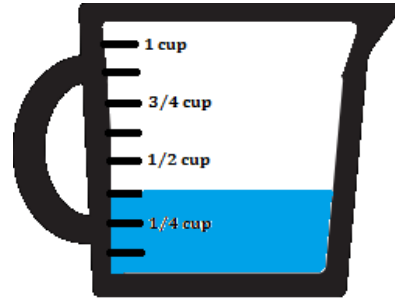

In this worksheet, we will practice measuring liquid volume. As you do the questions below, notice that each black mark is equal to $\frac{1}{8}$ of a cup. Also, remember that 1 cup = 8 ounces. This means that each black mark is also equal to 1 ounce.

Exercise Questions:

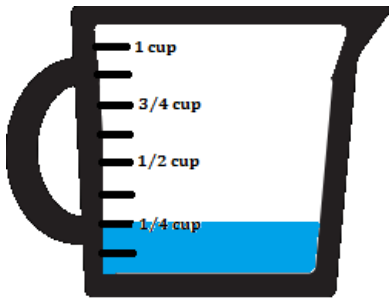

1.

How many cups? _____

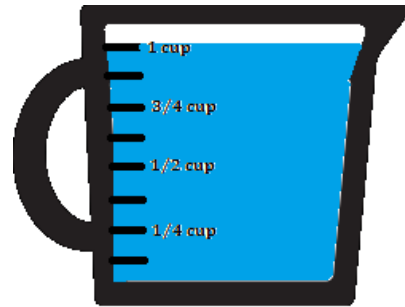

4.

How many cups? _____

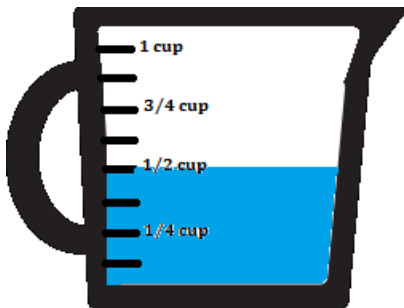

2.

How many cups? _____

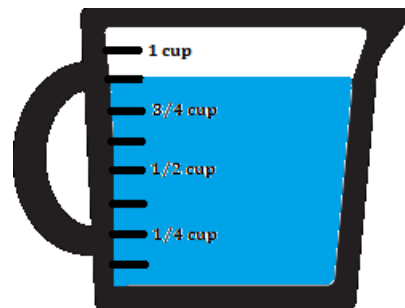

5.

How many ounces? _____

3.

How many cups? _____

6.

How many ounces? _____

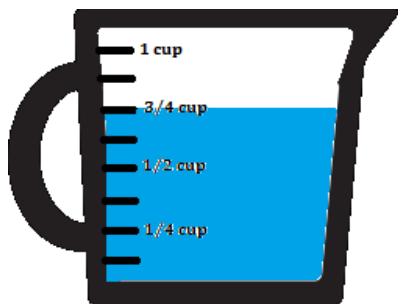

Answer Key

Measuring Liquid Volume

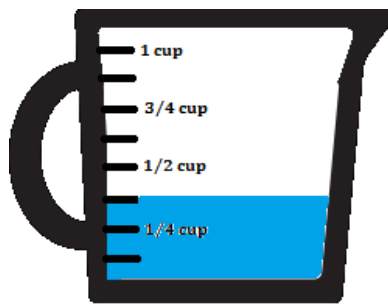

In this worksheet, we will practice measuring liquid volume. As you do the questions below, notice that each black mark is equal to $\frac{1}{8}$ of a cup. Also, remember that 1 cup = 8 ounces. This means that each black mark is also equal to 1 ounce.

Exercise Questions:

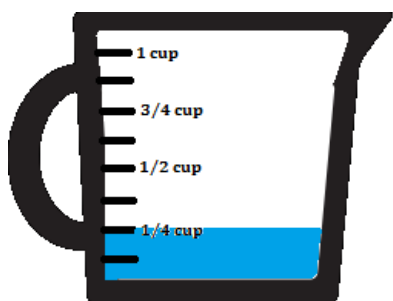

1.

How many cups? $\frac{3}{8}$ cup

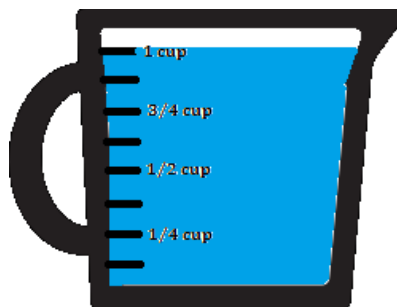

4.

How many cups? $\frac{3}{8}$ cup

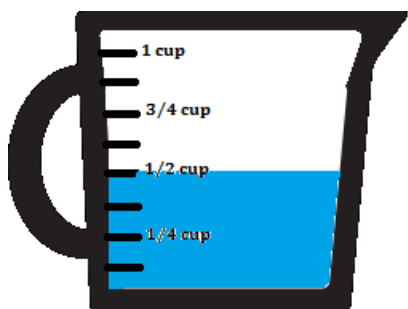

2.

How many cups? $\frac{1}{8}$ cup

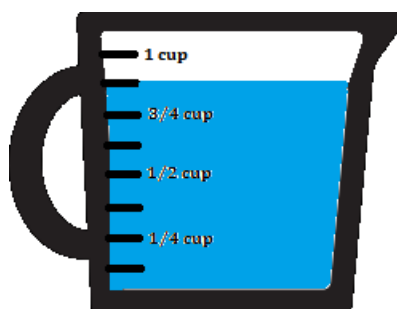

5.

How many ounces? 8 ounces

3.

How many cups? $\frac{1}{2}$ cup

6.

How many ounces? 7 ounces
