## Multiplying Whole Numbers

| In this worksheet, we will practice multiplying whole numbers in both single-step and multi-s problems. <br> Remember, with multiplication, we start by multiplying numbers in the ones place, then, the tens place, and so on- moving right to left. |  |  |
| :---: | :---: | :---: |
| Single-step ex: $154$ |  |  |
| + 6 | $\begin{array}{r} 12 \\ \times \quad 4 \\ \hline 48 \\ \times \quad 18 \\ \hline 864 \end{array}$ | (remember to leave a placeholder 0 during the second step, since you are multiplying $48 \times 10, \operatorname{not} 48 \times 1$ ) |

## Exercise Questions:

1. Write the product:
$29 \times 5=$ $\qquad$
2. Write the product:
$14 \times 15=$ $\qquad$
3. Write the product:
$213 \times 6=$ $\qquad$
4. Write the product:
$9 \times 25 \times 7=$ $\qquad$
5. Max rakes yards in the fall. If he gets paid $\$ 20$ a yard and he rakes 12 yards, how much money will he make? $\qquad$
6. Beth's cat had 6 kittens. If each kitten grew up and had 5 kittens, how many total cats would there be? Hint: don't forget about the first mama cat!
$\qquad$
7. Janice can read 3 books a week. How many can she read in 3 months? $\qquad$
8. Benjamin can write his name 6 times in 30 seconds. How many times can he write his name in 5 minutes? $\qquad$

## Answer Key

## Multiplying Whole Numbers

## Exercise Questions:

1. Write the product:
$29 \times 5=$ 145
2. Write the product:
$14 \times 15=\underline{210}$
3. Write the product:
$213 \times 6=1278$
4. Write the product:
$9 \times 25 \times 7=\underline{1575}$
5. Max rakes yards in the fall. If he gets paid $\$ 20$ a yard and he rakes 12 yards, how much money will he make? $\qquad$ $\$ 240$
6. Beth's cat had 6 kittens. If each kitten grew up and had 5 kittens, how many total cats would there be? Hint: don't forget about the mama cats! 37
7. Janice can read 3 books a week. How many can she read in 3 months? $\qquad$ 36
8. Benjamin can write his name 6 times in 30 seconds. How many times can he write his name in 5 minutes? $\qquad$ 60
