

Name _____

Date _____

Measuring the Wind

In this worksheet, we will decide the direction and strength of the wind by looking at wind socks and wind vanes. Remember, wind vanes point in the direction that the wind is blowing and wind socks are limp with a weak wind and fill up with a strong wind. The first question is done for you.

Exercise Questions: (Circle one answer)

1. Which direction is the wind blowing?

(west) or north

2. Which direction is the wind blowing?

north or east

3. Which direction is the wind blowing?

north or south

4. Which direction is the wind blowing?

east or north

5. The wind is:

strong or weak

6. The wind is:

weak or strong
