

Name _____

Date _____

Parts of a Plant

In this worksheet, we will identify the different parts of a plant on a diagram. We will also decide what these plant parts do. For example, the *stem* is labeled below. The *stem* is responsible for carrying water and soil nutrients from the roots to the leaves.

Exercise Questions:

Word Bank:

Flower

Leaves

Roots

5. What is the flower responsible for?

- A) making oxygen
- B) making energy
- C) making seeds
- D) supporting the plant

6. What do the leaves do?

- A) make energy from the sun
- B) make seeds
- C) support the plant
- D) transport water and nutrients

7. What do the roots do?

- A) make energy from the sun
- B) support the plant
- C) absorb water and nutrients
- D) both B and C

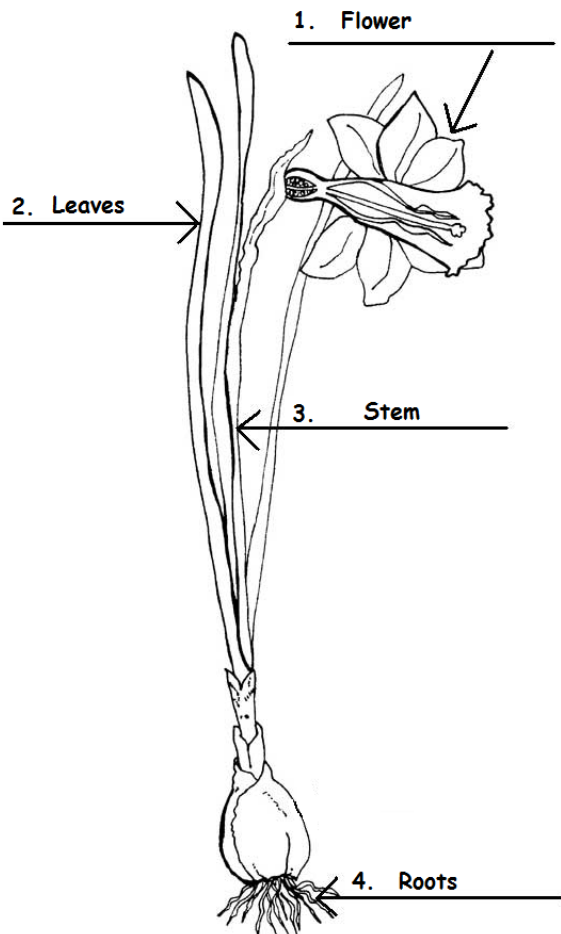

Answer Key

Parts of a Plant

In this worksheet, we will identify the different parts of a plant on a diagram. We will also decide what these plant parts do. For example, the *stem* is labeled below. The *stem* is responsible for carrying water and soil nutrients from the roots to the leaves.
