Parts of a Tree

In this worksheet, we will practice identifying the different parts of a tree on a diagram. Then, we will decide what the different parts of the tree do. For example, the leaves are already labeled. The leaves make energy from the sun, using a process called photosynthesis.

Exercise Questions:

1. Leaves

2.

3.

4.

5.

6. The ____________ protects the tree from the weather.

7. The ____________ is the name for the parts of the tree that show above the ground.

8. The tree’s ____________ is its stem. It transports water and nutrients from the roots to the leaves.

9. The tree’s ____________ absorb water and nutrients from the soil and help the tree to stand up strong.

Word Bank:

- Crown
- Bark
- Trunk
- Roots
